Town house, Bogense

Classic-Line® er udviklet i samarbejde med de anderkendte danske arkitekter Benedicte og Poul Erik Find. Som navnet antyder, er det en klassisk serie af dørgreb og beslag, der er designet med inspiration fra bygningshistorien og tilpasset ældre og bevaringsværdige bygninger. Classic-Line® leveres i massiv poleret messing – et materiale, der med sin specielle glød og elegance fremhæver den klassiske udtryksform.

Classic-Line® has been developed in collaboration with the renowned, Danish architects, Benedicte and Poul Erik Find. As the name suggests, it is a series of classic lever handles and fittings designed with respect for architectural history and therefore, a perfect choice for old buildings worth preserving. Classic-Line® comes in solid, polished brass – a material that highlights the classical mode of expression through its special glow and elegance.

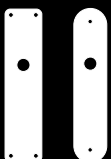

Classic-Line®

Classic-Line®

Classic-Line®, der er udviklet i samarbejde med arkitekterne Benedicte og Poul Erik Find, er et omfattende program af dør- og bygningsbeslag samt tilbehør i 2 klassiske designs, H-form og C-form. Fremstilles i massiv poleret messing.

H-formen

H-formen tager udgangspunkt i den geometriske form "firkanten". Anvendes i byggeri med stramme, firkantede former som eksempelvis klassicistiske huse, bindingsværkshuse m.v.

C-formen

Det geometriske udgangspunkt for C-formen er "cirklen". Anvendes til byggeri med stramme cirkulære og mere opløste former som f. eks. rokoko, funktionalisme m.v.

Overflade

Classic-Line® leveres i massiv poleret messing. Et materiale, der med sin glød og sit gedigne præg har en lang tradition i bygningshistorien. Kan fås i en forkromet udgave, som vi bl.a. har leveret til Hotel d'Angleterre, se side 55.

Anvendelsesområder

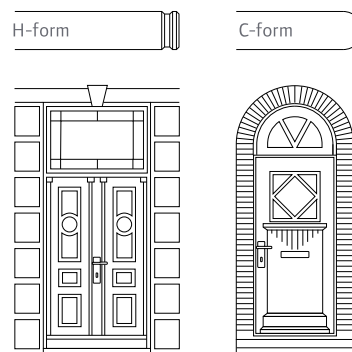

Classic-Line® kan ved en korrekt sammensætning af beslagseriens grebstørrelser, langskilte og rosetter lede besøgende rundt i bygningens primære og sekundære rum, hvilket ligeledes er et vigtigt element i bygningshistorien.

Vedligeholdelse

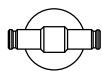

Messing danner en naturlig varieret patina, der som således ikke kræver pleje. Messing kan endvidere ved brug af messingpudsemiddel fremhæves med en velkendt, meget smuk og spejlblank overflade.

Bygningsfredning

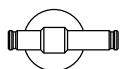

Ved fredede og bevaringsværdige bygninger med originale låse, bør disse i videst muligt omfang bevares. Ved tvivlsspørgsmål kontakt venligst Fredningskontoret under Skov- og Naturstyrelsen eller arkitekter m.a.a. Benedicte og Poul Erik Find.

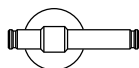

Valg af greb

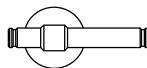

Krydsgrebet er designet til såvel små ejendomme som til lofts-værelser, skabs- og pulterrum i større ejendomme.

Krykgreb lille, er udviklet med henblik på større ejendomme – f.eks. til indvendige døre i byejendomme. Fås med diverse langskilte til indvendige, dobbeltfløjede døre.

Krykgreb mellem, er specielt tiltænkt hoveddøre til bygningen samt indvendige fløjde døre.

Krykgreb stort, anvendes til større hoveddøre i palæbygninger o.l.

Classic-Line® leveres med diverse rosetter og langskilte til træskrue, passende til alle gamle låsetyper. Langskilte kan om ønskes fastgøres med gennemgående skrue, ligesom beslags-serien også leveres med rosetter til alle moderne låsetyper.

Classic-Line®

Classic-Line®

Classic-Line®, designed by the architects Benedicte & Poul Erik Find, is a comprehensive series of elegant architectural hardware and accessories in two classical designs – the 'H'-style and the 'C'-style – both made from solid brass.

H-style

This style takes its design point from the geometrical form of the square. Ideal for use in buildings with strong square shapes and lines.

C-style

This style takes its design point from the geometric form of the circle. Ideal for use in buildings with circular and curved accents.

Finish

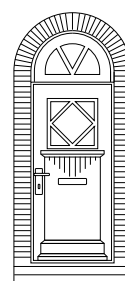

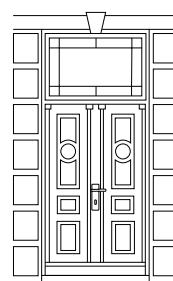

Classic-Line® is manufactured from solid, polished brass. Used for many years in the building industry brass offers both a special brilliance and robust character. Available in chrome at request, see page 55.

Maintenance

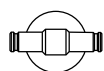

Over time brass takes on a naturally dark patina which requires no special care. However, if desired the warm, golden surface can be easily maintained by using brass polish.

Protected buildings

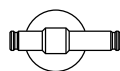

When specifying hardware for the renovation of listed buildings with preservation orders great care must be taken if the original locks are still being used. Consult the relevant authorities or contact Randi.

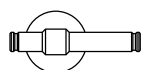

Ideal applications

The 'T' Bar cross handle was designed for use in smaller buildings and in areas such as loft conversions and storage rooms in larger buildings.

The small lever handle was developed with larger buildings in mind – and is suitable for use on internal doors in domestic buildings. Available with a range of elongated backplates.

The medium lever handle was specially designed for entrance and internal doors.

The large lever handle is for larger main doors in stately homes and other buildings with similar architectural hardware specifications..

Classic-Line® is available with a wide range of escutcheons and elongated backplates to suit many types and sizes of locks. Backplates can be fixed with bolt through fixings.

P3010

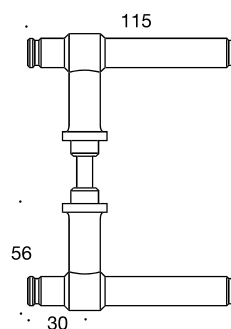

H-formet krykgreb, ø16 mm

- Leveres som standard i massiv poleret messing.
- Leveres i sæt til dørtykkelse 34-58 mm eller 58-82 mm.
- Standard dørgrebspind, 8x8 mm.

H-style lever handle, ø16 mm

- Available in solid, bright polished brass.
- Supplied in pairs, for door thickness 34-58 mm or 58-82 mm, specify door thickness when ordering.
- Standard spindle 8x8 mm.

Hotel D'Angleterre, Copenhagen, DK.

Da det hæderkronede hotel D'Angleterre skulle føres tilbage til tidligere tiders storhed blev det i samarbejde med Randi, C.F. Møller Architects og bygherre besluttet, at der skulle sidde Classic-Line® greb på dørene. For at matche designlinien og de øvrige beslag blev det besluttet, at dørgrebene skulle være forkromede. En fuldendelse af helhedsindtrykket og en oplevelse af elegance.

The hotel has undergone a complete refurbishment, which is inspired by its rich heritage. The new style of the hotel is contemporary classic. The architect C.F. Møller Architects, Randi and the builder agreed to use a special chromed version of Classic-Line® on the doors.
