

# MS1 Pay & Display Pay Station

The MS1 is our trusted Pay Station. MS1 incorporates the unique features of the Proven™ IPS parking meter platform, while offering many customer-focused features. This Pay Stations features robust hardware design, which includes a stainless-steel cabinet, armoured glass and high security anti drill locks.

## Features include:

- The MS1 can operate as pay and display, pay by plate with cash or 100% cashless.
- Highly secure, with a double vault manufactured from 2.5mm stainless steel. Six-point locking vault with three locked access.
- PCI Level 1 & PA-DSS 4.0 compliant chip and contactless card payment solution.
- True Roaming Sim - Connect to any operator.
- High security stainless steel housing (standard) with anti-graffiti coating makes the MS1 both durable and easy to maintain.
- High brightness LED illumination of the full fascia, including the optional registration entry keypad.
- User friendly buttons and keypad.
- Update and change your own tariffs in real time.
- Smart Cities: The open interface within the IPS products provides seamless push or pull web-services integration with third-party solutions.

## PHYSICAL SPECIFICATION

**Weight:** 80Kg Dimensions: 317x305 x 1524mm;  
MS1 is compliant with all relevant standards for disabled access

**Power:** Solar (standard) or 240V mains electricity.

**Temperature Range:** -40°C to +85°C; Optional heater (240V units only).

**Payment Accepted:** Chip & contactless credit/debit cards (PCI Level 1 V4.0) and coins.

**Cabinet Housing:** Unibody construction. High grade corrosion-resistant and covered with weather and anti-graffiti powder coating.

**Locks:** Cabinet is protected by a six (6) point secure locking system. The outer vault door locks are protected by anti-drill spin disks. Upper and lower housing require separate keys. The collection vault has a dual locking system with a T-bar.

**Display:** Large monochrome display screen is 320 x 240 pixels and allows for 7 lines of alpha-numeric or graphical messages. Display is protected by anti-glare coated armoured glass (standard feature).

**Printer:** A high-resolution graphic thermal printer allows for customisable graphics, vouchers and barcodes which are programmable from the Data Management System (DMS).
